Welcome to Software Carpentry!
June 8-9, 2016

<u>Instructors:</u>

Danielle Nielsen

Matthew Garcia

Sarah Stevens

Lauren Michael

<u>Host:</u>

Advanced Computing

Initiative

What is 'Software Carpentry'??

- Non-profit, international organization
- Teaches workshops to help researchers adopt reproducible computational practices
- Instructors are all volunteers
- Materials developed by open science community
- Code-a-long learning model

Code of Conduct

- http://software-carpentry.org/conduct/

- Harassment includes offensive verbal comments related to gender, sexual orientation, disability, physical appearance, body size, race, religion, sexual images in public spaces, deliberate intimidation, stalking, following, harassing photography or recording, sustained disruption of talks or other events, inappropriate physical contact, and unwelcome sexual attention.

- All communication should be appropriate for a professional audience including people of many different backgrounds. Sexual language and imagery is not appropriate for any event.

- Be kind to others. Do not insult or put down other attendees.

- Behave professionally. Remember that harassment and sexist, racist, or exclusionary jokes are not appropriate.

Workshop Logistics: Where Stuff Is

Restrooms
Across the hall

Beverages
Drinking fountain: across the hall
Coffee/tea: front left corner of room, all day

Lunch
On your own.
Need a fridge? Let us know.

If You Can't Reproduce It,
Is It Still Science?
And how long will it take?

Inspired by Greg Wilson,
Software Carpentry

https://xkcd.com/242/

Reality of Research Computing

- Many scientists spend most of their time developing, maintaining, or running software

  - Most don't consider themselves software engineers

  - Few have ever been taught how

So what?

- Most results take longer to produce than they need to

- Difficult to assess quality

Software Carpentry to the Rescue

- Best practices used by the best software engineers whose business is development of quality software
  - They don't always have formal training
  - They don't always follow all the practices
 - Growing evidence supported by empirical studies

Software Carpentry Practices

- Write software for people, not computers

- Automate repetitive tasks

- Use the computer to record history

- Make incremental changes

- Use version control

- Don't repeat yourself

- Plan for mistakes

- First make it correct, then make it fast

- Document design & purpose, not just mechanics

- Conduct code reviews

Thoughts on Productivity and Automation
Thoughts on Productivity and Automation

HOW LONG CAN YOU WORK ON MAKING A ROUTINE TASK MORE EFFICIENT BEFORE YOU'RE SPENDING MORE TIME THAN YOU SAVE?
(ACROSS FIVE YEARS)

| | HOW OFTEN YOU DO THE TASK | | | | | |
	50/DAY	5/DAY	DAILY	WEEKLY	MONTHLY	YEARLY
1 SECOND	1 DAY	2 HOURS	30 MINUTES	4 MINUTES	1 MINUTE	5 SECONDS
5 SECONDS	5 DAYS	12 HOURS	2 HOURS	21 MINUTES	5 MINUTES	25 SECONDS
30 SECONDS	4 WEEKS	3 DAYS	12 HOURS	2 HOURS	30 MINUTES	2 MINUTES
1 MINUTE	8 WEEKS	6 DAYS	1 DAY	4 HOURS	1 HOUR	5 MINUTES
5 MINUTES	9 MONTHS	4 WEEKS	6 DAYS	21 HOURS	5 HOURS	25 MINUTES
30 MINUTES		6 MONTHS	5 WEEKS	5 DAYS	1 DAY	2 HOURS
1 HOUR		10 MONTHS	2 MONTHS	10 DAYS	2 DAYS	5 HOURS
6 HOURS				2 MONTHS	2 WEEKS	1 DAY
1 DAY	1 DAY				8 WEEKS	5 DAYS

(HOW MUCH TIME YOU SHAVE OFF)

Your closest collaborator is you six months ago,
but you don't reply to emails.

Make Incremental Changes Redux

- Choose one practice
  - Implement it in your work
  - Share it with your lab group
  - Allow it to sink in

- Repeat

Where to Start?

- Depends on the nature of your work

- Consider the purpose:
    - Improve productivity
    - Improve quality

Workshop Logistics: Continuous Feedback

Nametags
green side up – exercise completed
red side up – exercise in progress; HELP!
nametag down – all is okay

Post-Its
At each break, indicate something that was good and something that could be better.

Post-Workshop Survey (1/2 of your entry fee!)
You'll receive a link from us after the workshop.
